The AQUALity Standard

We Install a Soft Bottom Only / We Don't Cut Corners

Every Installation Includes a Professionally Prepared Vermiculite & Cement Pool Base Topped with a Custom-Cut Geotextile Felt Pad called an Elephant Pad or a Gorilla Pad

An Elephant/Gorilla Pad is a 1/8" Cushion that goes between the Liner and the Base. This System Provides Added Durability, Comfort and Protection for your Liner against rocks, roots and sharp objects.

IMPORTANT BEFORE INSTALLATION

You MUST call **811** before digging, This is a FREE SERVICE provided by the Great State of Tennessee They will usually arrive within 3 Days. If 811 is not called, we may not be able to install your pool.

Site Conditions that Affect the Install

- We Cannot build on fill dirt (it must settle 1 year)
- Stumps, large rocks, could prevent installation
- Any heavy obstruction could prevent installation
- An existing deck may affect installation
- (All site conditions evaluated case-by-case.)

WEATHER POLICY

All install dates depend on weather conditions.
Rain Greatly affects our scheduling.
AQUALity Pools CANNOT guarantee an Install Date

READY TO TAKE THAT FIRST SWIM?

We Appreciate Your Patience and Look Forward to Installing Your Pool!!

DEAL BREAKERS that take place after the dig process begins

Although these things rarely happen, they sometimes do and it is not anyone's fault

- * Rocks/Boulders that are under the sod & can't be seen that prevent the dig because they are too big to
- * Tree Stumps that are under the sod & can't be seen that prevent the dig because they are too big.
- * If during the dig process we hit trash, old vehicles, electrical lines, gas lines, field lines / septic tank lines that prevent the dig.

Yes, we have encountered all of the above including old vehicles that were buried sometime in the past. If after we begin digging we hit anything that prevents us from digging and installing your pool, there will be a minimum charge of \$300 & not more than \$500 depending on how far we are in the dig process and the distance from the Cleveland store.

Payment is due in full when AQUALITY POOLS begins filling your pool

THINGS THAT RESULT IN AN UP-CHARGE

- * *Rocks that slow down the dig process (Grapefruit size and bigger)*
- * *Roots that have to be cut out by hand and therefore slow down our process*
- * *Anything that is under the sod that hinders the dig process*
- * *If for any reason we have begun digging & the pool has to be moved to a different location*

FOR YOUR CONVENIENCE

Professional Site Survey Available:

Survey Pricing:

- **\$50** - Within Bradley County (up to 25 miles)
- **\$75** - Outside Bradley County (up to 50 miles)
- **\$100** - Beyond 50 miles

What the Site Survey Includes

A professional visual inspection of the exact area where you plan to install your pool.

We Evaluate:

- Overhead power lines
- Yard slope and grade
- Trees and shrubs
- Concrete patios
- Wooden decks
- Overall layout and accessibility

This helps determine whether the pool can safely and properly be installed in your desired location.

PLEASE NOTE:

The site survey is a Visual Inspection Only
Anything underground - is the homeowner's responsibility

IMPORTANT NOTICE

* Properties with an existing pool deck from a previous installation will incur an additional charge.

* Modifications and adjustments due to an existing deck are not included in standard installation pricing.

Our Commitment to You

We never want to say NO to a customer

However, some yards are not conducive to installing an above ground pool. In certain cases, we may have to decline a project due to conditions beyond both the customer's control and the installer's control.

Our priority is safety, structural integrity, and doing the job correctly — not rushing into a problematic install.

Our installation rig is approximately 40 feet long. Adequate space is required to park and safely maneuver the vehicle, including room to turn around if necessary.
